Discharged to duty 1<sup>st</sup> June 99

This Case of continued Fever, was attended with the usual Symptoms of Pyrexia, I had ordered him to bed, in the evening the febrile symptoms being somewhat abated, I sent him a Sudorific Mollis, in the Morning found he had acted tolerable well, I gave him an opening Draught, I repeated the Mollis at Night, appeared Morning appearing pretty free from Fever, but complaining of pain across the eyes, I applied to Misters, he took the Saline Misters frequently thro the day, soon the fever abating, I poured in the back medicines, which had a good effect

Discharged to duty 19<sup>th</sup> May 1799

These Cases differed little from the common cases of Venereal I gave a Calomel purge, I put them on a course of Calomel orderd them a cooling Injection which they continued to use till the mouth became slightly affected (Night & Morning) after which the symptoms abating I orderd them the Marsh, a number of similar cases have I heard, which I thought needless to mention, differing no ways from the above ones

Dr. Burridge

Syphilis

Mens Name Ages and Qualities	When and where put on the Sick List	Statement of the Case when put on List.	Symptoms and treatment while under cure	When discharged, Died, or sent to the Hospital	Remarks
Mr. Day (Master Mate)	27 <sup>th</sup> May 1799 Barbadoes	Wounded from the Mangrove Apple, occasioning severe vomiting, and violent Convulsions, I pour'd down a good quantity of sweet Oil, applied the warm Bath in the Evening the symptoms began to abate in some measure, gave him a salomel purge, the next morning he brought away a considerable quantity of Blood & skins, the Coat of the stomach being corroded by the violence of this Fruit, (which is beyond every thing), the very main that drops from the tree takes of the skin of the part it touches, I gave him Cassia & strong solution of Marley & Vinegar to act as a mucus, for his common drink, he gradually recovered and on the 4 <sup>th</sup> June discharged him, but the effects of this Poison is never properly eradicated, as I have seen & heard in a number of instances, of the like kind.	Particularly from Gen. Woodly who had seen a number of the like kind.		
James Dower	28 <sup>th</sup> May	Wounded hard, in fishing the anchor	In this case the Man got his hand into a block, & got two of his fingers taken off & amputated higher & treated it as usual.	Discharged to duty 28 June.	and happened to be on board of us, taking his passage from Barbadoes, to Jamaica, for his own country, the Cherokee Nation, and has an intelligent Character.
Thos. Williams	11 <sup>th</sup> July 1799	Consumption	These six Men sent to the Hospital, being much reduced and continuall in the List, We being order'd on a Cruise they would have been an encumbrance, more than any thing else,		
Thos. Williams	11 <sup>th</sup> July	Rheumatism with great Debility		Discharged to the Hospital Jamaica	Lawrence Sitchell's contract was occasion'd previous to his joining the Arab, which was not known till afterward, when I had made out a smart Sitchell, therefore I cancelled the Sitchell, for which Capt. Capels Certificate will further certify,

James Dever	16 <sup>th</sup> June				
Sam. Myall	17 <sup>th</sup> June	Gravel.		Discharged to duty 20 <sup>th</sup> June 1799	
			<p>11<sup>th</sup> Sal: Glaub: 12<sup>th</sup> 13<sup>th</sup> 14<sup>th</sup> 15<sup>th</sup> 16<sup>th</sup> 17<sup>th</sup> 18<sup>th</sup> 19<sup>th</sup> 20<sup>th</sup> 21<sup>th</sup> 22<sup>th</sup> 23<sup>th</sup> 24<sup>th</sup> 25<sup>th</sup> 26<sup>th</sup> 27<sup>th</sup> 28<sup>th</sup> 29<sup>th</sup> 30<sup>th</sup> Sal: Glaub:</p>		<p>These Patients evacuated a considerable quantity of sand &amp; some blood, I ord'd them an opening draught, and an Emollient Mixture with Linseed tee, for their common drink, which was continued to the 28<sup>th</sup> when I discharged them,</p>

Mens Names, Ages, and Qualities	When and where taken on the Sick List	Statement of the Case, when put on List	Symptoms and treatment while under cure,	When discharged to duty, died, or sent to the Hospital	Remarks
Mr. Smith (Surgeons Mate)	20 <sup>th</sup> June Jamaica	Yellow Fever	These cases were the complete Yellow Fever, the first symptom that occurs is a quickness of the pulse in the head and violent itching attend'd with an immoderate irritability of the stomach & the whole frame, succeeded by general lassitude & debility after the inflammatory stage is over, a total inaction prevails over the patient, who appears in fact, quite unconcern'd about his state, or welfare, or gives himself up to despair, this stage is almost always succeed'd by a yellow tinge over the whole surface of the body, with a fetid smell of the whole patient, rendering him totally unbearable, a thick yellow Lanic coats the white of the yellow eye, on the third day, the whole frame partakes especially the Larynx & throat which renders the patient incapable of deglutition, the nostrils become affected, & respiration extremely difficult, which is performed by the nostrils solely, a rattling of the throat succeeds, when the patient expires in a most horrid state of agony howling hideously, & when a sh'd (being frequently anible to the moment of their death) they exclaim, that they cannot help it, then this distressful scene terminates the method of cure I have	Discharged to duty 14 <sup>th</sup> July at sea	Always practised & most of the Surgeons on this station is, on the first attack of this Fever, is if Methore prevails, to bleed, administer a calomel purge, and apply a good sizeable blister on the pit of the stomach, with blisters on the temples, which generally relieves the head & takes off the irritability of the stomach
Mr. Millson	21 <sup>st</sup> June at sea	Yellow Fever		D.D. 21 <sup>st</sup> June at sea	When throw in Calomel to the amount of five grains every hour untill the mouth becomes affected, when the case is urgent, I have seen Mercury given in wonderful quantities, at the same time
Mr. Day	21 <sup>st</sup> June at sea	Yellow Fever		D.D. 21 <sup>st</sup> June at sea	which I find is the only liquid that will remain on the stomach & has a good effect, by relieving the gastric in some measures when the inflammatory stage abates, I throw in the Maska & Wine, in as large quantities as the patient will bear,
Mr. Spratt	22 <sup>nd</sup> June at sea	Yellow Fever		D.D. 21 <sup>st</sup> June at sea	Yellow them Sago & wine for their diet, & open their bowels occasionally
Mr. Driscoll (Carpenter)	22 <sup>nd</sup> June at sea	Yellow Fever		D.D. 25 <sup>th</sup> June at sea	D.D. Good Wine I find is extremely beneficial in the state of Apathy which occurs in this case, I wish I was dorry to say is not to be got, or allowed,
Mr. Anderson	25 <sup>th</sup> June at sea	Yellow Fever		D.D. 29 <sup>th</sup> June at sea	As also one of the symptoms & last one, is an hemorrhage from the mouth & nose
Mr. Preston	2 <sup>nd</sup> July	Yellow Fever		D.D. 7 <sup>th</sup> July at sea	many other slighter attacks have fell under my observation, which I thought worth to mention, these being the principal ones,
Mr. Bowden (Capt. Clerk)	3 <sup>rd</sup> July at sea	Yellow Fever		D.D. 8 <sup>th</sup> July at sea	I have seen the attack, till we get out to sea, with it
Mr. Shanks (Mid)	6 <sup>th</sup> July at sea	Yellow Fever		D.D. 9 <sup>th</sup> July at sea	
Mr. Oddy (Mar. Mate)	15 <sup>th</sup> July at sea	Yellow Fever		D.D. 20 <sup>th</sup> July at sea	
Mr. Burridge	23 <sup>rd</sup> June at sea	Yellow Fever	D.D. 29 <sup>th</sup> June at sea		
Henry Hudson	23 <sup>rd</sup> June at sea	Yellow Fever	D.D. 29 <sup>th</sup> June at sea		
Mr. Woodmett	27 <sup>th</sup> June at sea	Yellow Fever	D.D. 19 <sup>th</sup> July at sea		
Mr. Hinucane	29 <sup>th</sup> June at sea	Yellow Fever	D.D. 15 <sup>th</sup> Aug at sea		
Mr. Kumbo	2 <sup>nd</sup> July at sea	Yellow Fever	D.D. 10 <sup>th</sup> Aug at sea		
Mr. Perry	5 <sup>th</sup> July at sea	Yellow Fever	D.D. 10 <sup>th</sup> Aug at sea		
Lieut. Magnold (Marines)	5 <sup>th</sup> July at sea	Yellow Fever	D.D. 10 <sup>th</sup> Aug at sea		
Philip Lismore	5 <sup>th</sup> July at sea	Yellow Fever	D.D. 10 <sup>th</sup> Aug at sea

Martin Rowland  
In: Armstrong  
In: Fullerton

Filled, Engaging of three Spanish Frigates off  
the Havannah, at Twelve o'clock at Night on  
the 25<sup>th</sup> of July; - Rowland was killed by a  
round shot, Armstrong & Fullerton were killed by grape  
shot, which took them exactly on the Temple,  
& carried away, on side of their head, we engaged  
upwards of half an hour afterwards, & believe  
returned the compliment, pretty warmly, as the  
enemy, evidently slackned their fire, & drew off,  
in the interim we had two Men as under,  
wounded,

Co. Mills (M) } These Men were wounded by the splinters of a  
Edmund Garry (M) } round shot, which struck, the arm of the Gun  
carried it away & broke in a number of pieces  
retracted the different pieces, & dressed the wound,  
& discharged them as Mr. Martin

To Duty 26<sup>th</sup> July P. S. issued a Smart Ticket  
to each of these Men, dated the 26<sup>th</sup> July, being the  
same, by People on Ship at the  
by Log the 26<sup>th</sup> July, certified on the 26<sup>th</sup> July

Saml. Nelson	18 <sup>th</sup> Dec <sup>r</sup> Jamaica	Yellow Fever	This was the best attack of the Fever. The symptoms differ no ways from the cases before mentioned. I pursued the same plan of treatment, and found that Mercury was the most efficacious, and general practice therefore on the first affection I immediately <sup>threw</sup> it in, in quantities <sup>as the case required</sup> in the proportion of six grains every hour & when the case is desperate have recourse to give it more frequently, there is a species of Fever which they call the Malam which is (if possible) more destructive than the Jamaica attack These know 120 grains of Mercury to be given in a very short space of time, and the patient is now acting Lieut. of the Ship, Whistlers have an excellent effect, and relieve greatly the irritabil- ity of the Stomach which universally prevails It is a number of lighter attacks have occurred, which have done well & therefore have not mentioned them	D.D. 21 <sup>st</sup> Dec <sup>r</sup> D.D. 25 <sup>th</sup> Dec <sup>r</sup> To Duty 14 <sup>th</sup> Jan <sup>y</sup> D.D. 22 <sup>nd</sup> Dec <sup>r</sup> To Duty 20 <sup>th</sup> Jan <sup>y</sup> The Hospital To Duty 17 <sup>th</sup> Jan <sup>y</sup> D.D. 24 <sup>th</sup> Dec <sup>r</sup> D.D. 29 <sup>th</sup> Dec <sup>r</sup> D.D. 29 <sup>th</sup> Dec <sup>r</sup> The Hospital D.D. 1 <sup>st</sup> Jan <sup>y</sup> D.D. 3 <sup>rd</sup> Jan <sup>y</sup> To Duty 19 <sup>th</sup> Jan <sup>y</sup> D.D. 20 <sup>th</sup> Jan <sup>y</sup> & Duty D.D. 2 <sup>nd</sup> Jan <sup>y</sup> D.D. 24 <sup>th</sup> Jan <sup>y</sup> D.D. 10 <sup>th</sup> Jan <sup>y</sup> D.D. 25 <sup>th</sup> Jan <sup>y</sup> at Sea To Duty 29 <sup>th</sup> Jan <sup>y</sup> To Duty 25 <sup>th</sup> Jan <sup>y</sup> To Duty 25 <sup>th</sup> Jan <sup>y</sup> To Duty 1 <sup>st</sup> Feb <sup>r</sup> D.D. 24 <sup>th</sup> Jan <sup>y</sup>	It is wonderful what ravages this Fever makes in a strong constitution in a very few hours, the state of apathy which succeeds is equally surprising, one case in particular, Mr. Minucan has lain in his Hammock for upwards of three weeks when I was actually obliged to throw the Volatile Salt as a stimulant at the same time applied a blister to the Nape of the Neck for the same purpose, good thing I find an excellent thing, especially with the Weak, Lay the Marinaer on diet, & allow them with plenty of Marley water, for drink.

I examined the Skull and found all safe, the Scalp was much torn, I bled him & order'd a dose of Salts with the saline mixture
Mr. Maffey	18 <sup>th</sup> Dec. at Sea	Sciatica	<p>1<sup>st</sup> Calomel gr of Cons: Cinorb.  19<sup>th</sup> 1/2 ft. 1/200, 1/20j 1/20j 1/20j  20<sup>th</sup> 1/2 ft. 1/200, 1/20j 1/20j 1/20j  21<sup>st</sup> 1/2 ft. 1/200, 1/20j 1/20j 1/20j  22<sup>nd</sup> 1/2 ft. 1/200, 1/20j 1/20j 1/20j  23<sup>rd</sup> 1/2 ft. 1/200, 1/20j 1/20j 1/20j  24<sup>th</sup> 1/2 ft. 1/200, 1/20j 1/20j 1/20j  25<sup>th</sup> 1/2 ft. 1/200, 1/20j 1/20j 1/20j  26<sup>th</sup> 1/2 ft. 1/200, 1/20j 1/20j 1/20j  27<sup>th</sup> 1/2 ft. 1/200, 1/20j 1/20j 1/20j  28<sup>th</sup> 1/2 ft. 1/200, 1/20j 1/20j 1/20j  29<sup>th</sup> 1/2 ft. 1/200, 1/20j 1/20j 1/20j  30<sup>th</sup> 1/2 ft. 1/200, 1/20j 1/20j 1/20j</p>	Discharged to Duty 18 <sup>th</sup> Dec.	This case of Sciatica, differ'd little from Rheumatic affection, in general, I order'd a Calomel purge and the Volatile Liniment, but the pain and inflammation continuing, I had recourse to a blister which had the desired effect.

Mens. Name, Ages and Qualities	When & where put on the Sick List	Part of the case when put on the List.	Symptoms and treatment while under Care	When discharged to Duty, Died or sent to the Hospital.	Remarks
Mr. Church	19th Mar. 1800	great diseas'd Toe, occasion'd by a severe blow attended with a Gonorrhoea, I amputated the part beyond the first Joint, and dress'd it as a common wound, it succeed'd very well for some time, till the Sedroy got into the sore, when from a fine white Pus, it began to discharge a very offensive Matter, and the Lad being of a Mad habit of Body, I thought it advisable to send him to the Hospital as he would have the benefit of a fresh Vegetabile diet, which is a grand consideration without any good effect,	Sent to the Hospital Jamaica 21st Mar. 1800		I observed the Ulcers in this Country to be particularly hard of Cure, whether it's owing to the high rarified state of the Humour, or want of continuity of the fibres, I can't say, but it is a general complaint amongst the Surgeons on the Station. Yield the Digestive plan with a course of Alteratives to answer better than any other mode of practice, the Diet, Drinks & the Marks with the Corrosive Cathartic every thing I can think of, the constant bleeding which attends every sore (ever so small) is alarming to the patient, a Quantitie of Acid seems to be beneficial
Mr. Wilson	3rd Mar.	Large Corbutic Ulcer	The Method of treatment is nearly the same, the Alterative plan, with Digestives, I find gives a check to the Ulcer more than any other method, therefore I adopt that, almost universally, a Calomel purge twice at wegh contribute much to the Cure, by relief the System of the peccant humor is a great measure & the Alteratives in the habit counteract what virus may remain	Sent to the Hospital Jamaica 21st Mar. 1800	This Ulcer was particularly foul, and large, discharging an offensive ichor, therefore I sent him to the Hospital thinking a change of Diet, might bring about a Cure if any thing would, I order'd plenty of Acids to be made use of N.B. The Scurvy is very prevalent, both in my observation tho' not objects altogether for the List, I have not inserted them

Mr: Johnson

16<sup>th</sup> March

Scorbutic Ulcer

This was a foul Ulcer, discharging an acrid serous matter, and much Haemorrhage, with inflammation, I dress'd with some Marsh sprin-  
gled over the sore, and an emol-  
lient poultice over all, 17<sup>th</sup> very little alteration, the part inflam'd with a very bad discharge I orderd a dose of Sal: Glaub: with  
18<sup>th</sup> a continuance of the above, 18<sup>th</sup> still a very bad appearance, with every prospect that an application  
might take place, and the Tibia slightly denuded, I put him on the course

of alteratives, which I have given & seen used before, with success, but in fact the Ulcers in this country are so virulent, that, I think scarce anything has much effect, I find the Bark and Calomel, to be as useful, as anything else the Haemorrhage that attends large Ulcers is surprising and to the patient, not a little alarming, 19<sup>th</sup> little alteration, appearance still bad, with a discharge of blood, 20<sup>th</sup> serous pus, with great pain along the leg, and that he might be better enabled to get a Vegetable, Farinaceous diet. I sent him to the Hospital, tho on our arrival, I was to demand the best diet, allow'd to men not exactly objects for the Hos-  
pital, which has an excellent effect.

10<sup>th</sup> April

Contused Finger

This was occasioned by the block, in the act of hauling on board the Main Mast, the first joint of the thumb being a good deal shattered & amputated, it, but from habit, being a good deal addicted to the labor, I sent him to the Hospital, that he might get a fresh diet,

Sent to the Hospital  
15<sup>th</sup> April

I have observed that Injuries of the Joints in this country very seldom heal, without taking it off, and always extremely tedious,

Am. Mac

15<sup>th</sup> May

Scorbutic Ulcer

This was a large foul Ulcer, discharging a foul sanies, with considerable inflammation over the leg, I made use of a little Calomel, laid over the sore, with an Emollient Cataplasm, over the whole, 16<sup>th</sup> It appeared much the same, considerable Hamorrhage, with a black discharge, 17<sup>th</sup> little alteration I changed the dressings for the time Juice & Bark, which I have known to have an excellent effect, 18<sup>th</sup> the discharge much the same, I order'd this until the 25<sup>th</sup> when I sent him to the Hospital,

from whence Invalided

℞ Sal: Glaub: ℥ss

the same, the sanies extremely offensive, and black, I order'd the Alterative Medicines, with the Lime Juice & Bark, 17<sup>th</sup> the Hamorrhage copious, and which attend almost the smallest Ulcers, and particularly distressing to the patient, in fact the Ulcers in this Country are as alarming as the Fever, I have seen them though they leave the bone denuded, in the space of twelve hours, and in the present case, I took out two of the small bones of the foot, the patient not being willing to under<sup>go</sup> Amputation, I thought it best to send him to the Hospital, as he there would get a Vegetable Diet, which was the only circumstance that could give him any chance of saving the Limb.

℞ Calom: ℥ss  
omne N: et mane

25<sup>th</sup> The Ulcers were extremely insomne & troublesome, but that very frequent on board the Acad, the principal cases will be recited and as for remedies, I have consulted Mr. B of the Hospital & the other Old Surgeons on the station to ascertain what might be their

plan of practice, as I have tried every thing I could think of, that labor's the most distant prospect of success, but I find it baffles every thing, I usually dress them twice a day, a change of climate is the only thing, on the 25<sup>th</sup> I sent him to the Hospital

Imp: Lane,

16<sup>th</sup> May

Debility

This was a case of extreme Debility the result of a Fever, the Pulse greatly almost impalpable, so very low, and reduced, I order'd a high, a bottle of Madeira Wine the 17<sup>th</sup> a day, with the Mark, 17<sup>th</sup> found him still in a very weak state, & perfectly earless, whether he recover'd or not in fact wish. to die I order'd a proportion of the Sal. Volat: as a stimulus, but his appetite was entirely gone, & he appear'd almost in an entire state of inanition, so much so that he was oblig'd to be mov'd by

D. Swift,

7<sup>th</sup> July

Ulcer

This differed very little or nothing  
from the case above therefore  
I sent him to the Hospital, as  
I find them very tedious, and  
extremely offensive, consequent-  
ly unhealthy, as a ship is  
a confined place, and when  
in Harbour, where proper  
Hospitals are established,  
I think it imprudent to  
keep them on board, for  
two reasons, as in the first  
place, the stench is beyond  
conception, of course rendering  
your ship a Hospital, &  
in the second they get a  
best diet on shore, which  
they have not on board, & as ships  
are more unhealthy in Harbour

than at sea, any cause that  
 can at <sup>all</sup> contribute to it, ought  
 certainly to be dispensed with,  
 these are the principal cases, that  
 have occurred since my last, and  
 those that have been sent on  
 shore; (those that have been  
 cured on board, I have not  
 inserted,)

Thos. Waite

7<sup>th</sup> July
